# PLASTAR

## What width and length grain bags do you have?

Our Plastar grain bags are 9 or 10 feet in width and range anywhere from 200 to 500 feet in length, depending on availability.

## What thickness are the bags?

We offer Plastar premium grain bags that are 9.3 mil in thickness. Our Plastar grain bags have been tested by the state of Missouri.

## How many bushels will a bag hold?

9ft Plastar grain bags will hold approx. 40 bushels per foot, 10ft Plastar grain bags will hold approx. 50 bushels per foot.

## How much do bags cost?

Our Plastar grain bags cost roughly 0.7 cents a bushel.

## What moisture can I store my grain at in grain bags?

See Chart below for general guidelines.

Risk in relation to grain moisture

Grain	Low (*)	Med/Low	Med/High
Soy, Corn, Wheat	Up to 14%	14-16%	Greater than 16%
Sunflower	Up to 11%	11-14%	Greater than 14%

(\*) For seed grain these values must be lowered by 1-2%

Risk in relation to storage time

Grain/Moisture Content	Low (*)	Med/Low	Med/High
Soy, corn, wheat 14% Sunflower 11%	6 months	12 months	18 months
Soy, corn, wheat 14%	2 months	6 months	12 months
Soy, Corn, wheat over 16%	1 month	2 months	3 months

All data supplied by INTA (National Institute of Agriculture and Livestock Technology- Argentina)

## How long can I store my grain in grain bags?

Plastar grain bags are designed to store grain up to 24 months.

## What types of grain can I store in grain bags?

Any type! Corn, soybeans, rice, wheat, barley, canola, sorghum.
